

CONNECT MAGENTO WITH ACUMATICA ERP

Kensium Solutions offers a connector that links your Magento e-commerce platform with Acumatica Cloud ERP. Aligning Magento and Acumatica allows a company's e-commerce website to leverage their existing customers, products, inventories, sales, and shipping data stored within Acumatica. This integration allows you to input data into one point (Acumatica or Magento) and automatically update information on the other end.

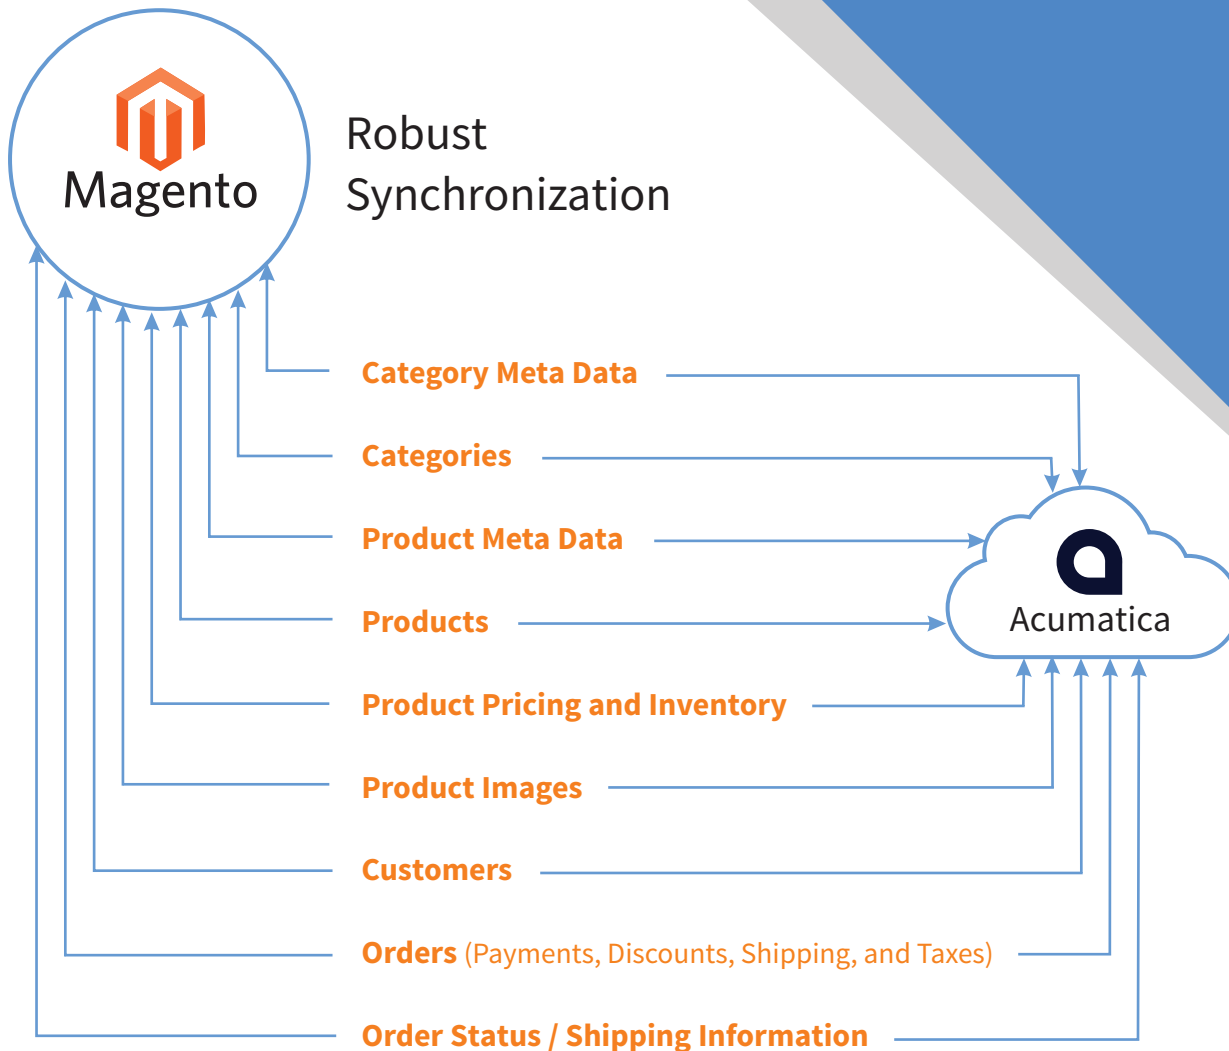

Why Integrate E-commerce and ERP?

- Leverage existing customer, inventory, sales and shipping data
- Reduce redundant manual entry
- Increase throughput while reducing errors
- Streamline inventory synchronization
- Provide an accurate picture of inventory across channels
- Automatically notify customers when orders ship
- Allow customers to track their product delivery from a single portal
- Simplify the application of discounts across your product mix
- Reduce exposure to risk by automating tax compliance
- Reduce the need to hire more staff
- Create the operational stability needed to grow

Match Your E-commerce Business Processes with Acumatica

- Significantly reduce order processing costs and boost your bottom line
- Scale your business to the next level
- Improve customer experience

Magento and Acumatica – An integrated solution that will bring you one step closer to providing your customers with omni-channel experience and increase sales.
