

## What is EazyStock?

**EazyStock is an inventory optimization software** designed to extend advanced forecasting, planning and replenishment capabilities to wholesale distributors in the durable goods industry.

EazyStock is an add-on solution for all ERPs, MRP's or WMS systems and is proven to deliver the following financial and operational results:

- Decrease in inventory levels by upwards of 30%
- Decrease stock outs and backorders by 10-15%
- Identify and address excess and obsolete inventory
- Decreasing supplier lead times from 30-50%
- Increasing planner productivity 10-20%.

## Benefits of EazyStock?

### Increase Forecasting Accuracy & Customer Satisfaction:

- 5-10% increase in order fill rates and on-time delivery
- 30-50% reduction in out of stocks and order lead-time variability
- 10-20% reduction time spent on manual inventory planning processes

### Increase Working Capital, Reduce Carrying Costs:

- 15-30% reduction in inventory and working capital costs
- 20-40% reduction in inventory carrying and obsolescence cost
- 20-30% reduction in time used in expediting orders

### No Infrastructure Investment Required:

- A secure Software-as-a-Service (SaaS) platform for users
- Simple ERP plugins for any legacy ERP system
- Software upgraded automatically twice per year
- IT hardware and software maintenance included (cloud service)
- Dedicated customer support specialists for EazyStock users
