

IMPLEMENT YOUR MANUFACTURING ON CLOUD TECHNOLOGY TO ACHIEVE COST SAVINGS AND FUTURE FLEXIBILITY

Adaptable ERP Software

BRING YOUR OWN DEVICE

Acumatica allows you to work from anywhere using your choice of device. Now with an interface that is tablet-friendly and optimized for mobile devices, you can work on a PC, Mac, iPad, or any other device with a browser.

SCALE AND GROW

Acumatica is Cloud-based so you can add capacity quickly. Since there are no user-based fees, you can add users in seconds.

DEPLOY ACCORDING TO YOUR NEEDS

Get Acumatica as a subscription (SaaS) or purchase the license. Deploy on-premises, on a hosted server, or on a Cloud platform.

YOU OWN YOUR DATA

So you can access it any time.

ADAPT AND INNOVATE

You get access to code and web development tools so you can adapt Acumatica to your existing processes.

On-the-Ground Support

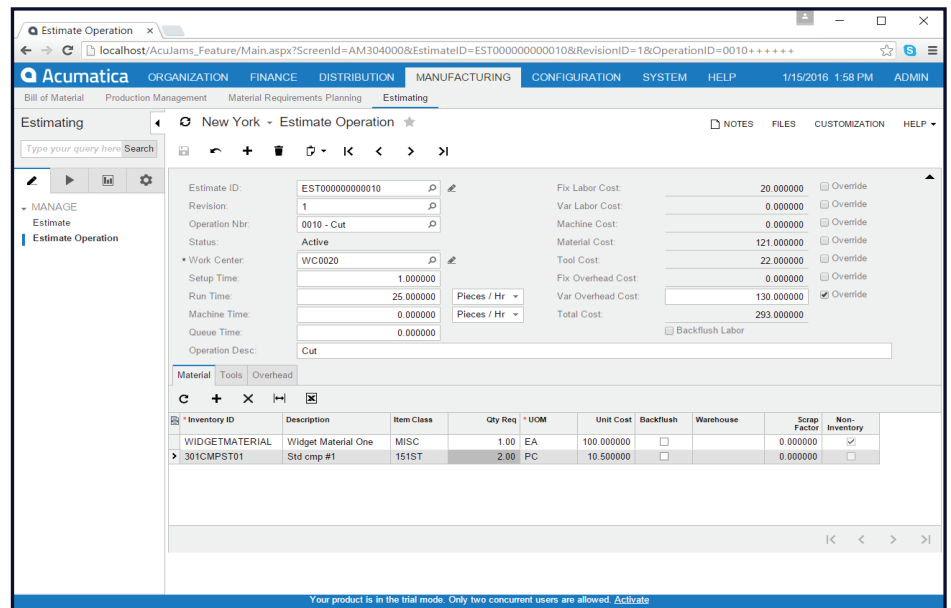

Acumatica is sold through a global network of value added resellers (VARs) who provide business planning, implementation, customization, local support, and other services.

ESTIMATING

Begin your manufacturing process with a fast and accurate estimate. With JAAS Advanced Manufacturing Software (JAMS) Estimating, the user is given the flexibility to quickly create detailed manufacturing estimates, improve estimate accuracy and turnaround times. It takes into account all aspects of estimating: material, overhead, labor, and other miscellaneous costs. Once the estimate is confirmed it can be easily converted to a Bill of Material or Sales Order.

Users can calculate costs and prices for new or existing parts using material costs, work center rates, and overheads, among other data. The estimate can be either linked, or not, to a quote or an opportunity.

KEY FEATURES

Non-Inventory Items	Provides the capability to estimate items not currently in Inventory. It also allows the user the opportunity to attach notes and files to the estimate as well as item attributes.
Create Inventory Items	Non-inventory items are easily converted to inventory stock items or non-stock items. Users can create inventory items and generate a Bill of Material from an estimate.
Revision Control	Allows for multiple revisions of the same estimate, showing a history of the revisions and who created the revision: providing an accurate estimate for expected labor, material and overhead costs.

ADDITIONAL FEATURES OF THE ESTIMATING MODULE

FEATURE	DESCRIPTION
Flexible Options	Allows the user to prepare an estimate for existing and/or custom items. It also provides the capability to create a simple, quick summary estimate or a detailed estimate utilizing a Bill of Material structure.
Flexible Copy Process	Providing the user an easy way to create a new estimate by simply copying or modifying an existing estimate, Bill of Material, or Production Order Bill of Material.
Create Production Order	Allows the user to create a Production Order directly from an Estimate.
Sales Integration	An estimate can be attached directly to, or against a sales order or an opportunity in Customer Management (CRM). It provides the capability to create a sales order directly from the estimate.
Multi-Site	Supports multiple sites.

JAAS Systems specializes in software solutions for manufacturing companies. The JAAS team has over 200 years of experience in the manufacturing industry with a strong blend of business, financial, operational, technology and consulting expertise. Combine this with our extensive background providing business software solutions and the result is JAAS Advanced Manufacturing Software (JAMS), a powerful manufacturing solution that delivers real-time information with a lower cost of ownership.

JAMS is a flexible software solution that supports multiple types of production environments, keeps you in control with real-time visibility and communication tools - just what you expect in a feature-rich, end-to-end manufacturing solution. Because our expertise is MANUFACTURING, we make it our business to understand your business.

"When manufacturing is YOUR business, it's OUR business"™

COMPLETE MANUFACTURING AUTOMATION

Manage sales, ordering, inventory, warehousing, production, shipping, fulfillment, and accounting from a single, integrated solution.

All of your employees, partners, and customers can create dashboards that deliver real-time information to speed decision making and improve business processes without the hassle of client software, VPNs, or complex IT management.
