Automation

Shipping
Automation

Acumatica manufacturers and distributors can take advantage of Edisoft's platform to achieve a **declining average EDI cost curve and a declining operational cost curve** as order volumes and number of customers increase.

Edisoft Merchant Cloud Services is an out of the box, SaaS supply chain platform for manufacturers and distributors, **available on any mobile device, anywhere in the world**. The modular software platform supports flexible communication options for EDI, and **seamlessly integrates with Acumatica's web services API** to automate EDI order posting, shipping, and invoicing processes. It also simplifies warehouse operations by eliminating a range of pick and pack tasks, and includes support for global transport carriers.

Merchant Cloud Services

- ☑ All-In-One Platform
- ☑ EDI Services
- ☑ Warehouse Services
- ☑ Carrier Management Services

Lower Costs

- ☑ Reduce Labour Costs Through Automation
- ☑ Eliminate EDI Non-Compliance Penalties
- ☑ Reduce EDI Transaction Fees
- ☑ Consolidate & Reduce Freight Costs
- ☑ Eliminate Data Entry Errors

Lower operating costs by leveraging data as a strategic asset to drive supply chain performance.

Reduce Warehouse Shipping Costs
Packing & Shipping Verification Made Simple

Edisoft's all-in-one platform includes track and trace reporting to help eliminate trading partner EDI non-compliance penalties.

EDI SERVICES

- ✔ Edisoft's innovative **XConnector** integrates via **ANY X12 communication protocol** and complies with the EDI specification requirements of **ANY trading partner**.
- ✔ Automatically print **UCC-128/GS1** carton and pallet labels, and customer branded drop ship packing slips.
- ✔ Support for multiple order types, including DC, DSD, cross-dock, and dropship (DVS) orders.
- ✔ Support for a multitude of EDI documents including purchase orders, invoices, advanced ship notice (ASNs), et al.
- ✔ Built in cross reference tables **extending Acumatica's Order Management & Fulfilment functionality** to enhance the supply chain process from start to finish.
- ✔ Additional modules available for remote warehouses (3PL), packing verification, and supplier outbound purchase orders.

WAREHOUSE SERVICES

- ✔ **Edisoft's QuikPAK** automatically pulls order data from Acumatica's Distribution Management Suite.
- ✔ Waving process automatically schedules and assigns orders across multiple sites/warehouse locations.
- ✔ **Multi-level packing**, customizable auto-packing rules, "Pre-Pack" and "Master Pack" options, and **support for RF handheld mobile devices** to scan and pack items to cartons, and cartons to pallets.
- ✔ Print engine to automatically generate trading partner and customer specific **shipping documents and reports**.

CARRIER MANAGEMENT SERVICES

- ✔ Integrated with over 250 carriers, easily retrieve shipment rates, carrier labels and other required documentation through **Edisoft's XCarrier**.
- ✔ Automatically select the optimal carrier and service level for shipments.
