

AcuCademy

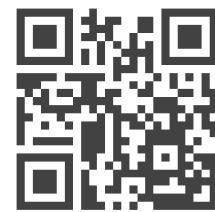

AcuCademy is a self-paced, eTraining platform for end users of Acumatica ERP. Inside our 12 courses, users will experience small, bite-sized instruction broken into 200+ videos, followed by hands-on practice and assessments. Our turn-key eLearning solution supports partners during implementations and provides reinforcement and a first line of customer support after go-live.

There Are 6 Parts to the AcuCademy Method:

- 1 A Guiding Question**
Each lesson starts with a question that the learner will be able to answer in detail by the end of the lesson.
- 2 Instructional Videos**
Videos are always 5 minutes or less, allowing users to learn when it is convenient for their busy work schedule.
- 3 Hands-On Practice**
After each video, users will find an opportunity to practice what they've just learned, ideally with their own data.
- 4 Proof of Progress**
End users must prove their knowledge by answering a question before moving on to the next lesson.
- 5 Learner Assessment**
We assess learners multiple times in a course when an instructional sequence has been completed.
- 6 First Line of Support**
Post go-live, AcuCademy serves as a resource for remediation, relearning and training new staff.
