

# Guiding you to the next level

Magento  
**SILVER**

Kensium Solutions specializes in architecting, building, and enhancing Magento e-commerce websites. We create deep partnerships to drive profitability for our clients. Leverage our experience to increase website traffic, conversion rates, and repeat customers. Kensium provides the guidance you need to reach the next level.

## If you've struggled to reach the next level...

A data driven approach to identify your site's key bottlenecks could help you focus your effort on things that count.

Refining your user experience could increase your conversion rates and increase repeat business.

Integrating ERP software to your Magento store allows you to sync orders, inventory, and fulfillment information - improving cash flows, and increasing customer satisfaction.

*We don't prescribe a standard list of products and services. There are no one-size-fits all answers. We thoroughly analyze your website with you, identify opportunities, and provide a tailored solution that will make you more money.*

## How We Partner Together

### Magento Services

- Certified Magento development and upgrades
- Maintenance and support partnerships
- Data-driven analysis of opportunities to drive profitability
- User experience improvement

### Magento Integrations

- Seamless connection to ERP systems
- Expertise with Acumatica – the cloud ERP solution
- Proficiency in end-to-end solutions and not just the front-end e-commerce store

# Magento 2 Development

Kensium Solutions is an experienced Magento Integration Partner offering design, development, integration and support for new and existing e-commerce businesses. We excel at...

Ground up implementation  
Migration and Upgrades  
3rd party Integrations
