Satisfy Customer Requirements While Maintaining Optimal Inventory Levels Using the Powerful MRP Planning Tool

Generate time-phased manufacturing and purchasing plans for optimal inventory availability tied to forecast and customer demands. Reduce inventory, improve customer service, and avoid shortages and stock-out scenarios that result in costly changeovers and rush orders.

**MRP DISPLAY**
- This core MRP screen shows the planner exactly what needs to be purchased and/or produced.
- All supply and demand can be viewed from this one centralized location.
- Production and Purchase Orders can be created directly from this screen.

**FULL REGENERATION**
- Schedule regeneration to run anytime, day or night.
- All existing planned orders for all items are eliminated.
- MRP starts over, calculating gross and net requirements, and then replans what materials are required to either be produced or purchased.

**MASTER PRODUCTION SCHEDULE**
- Drive your plan and your plant from the Master Production Schedule (MPS).
- MRP plans all requirements based upon MPS.
- MPS will be treated as a pre-planned production order and will act as a supply for other demand requirements.

**KEY BENEFITS**

**COORDINATE ACTIVITIES**
- Manage your entire business with complete, real-time information for your operations
- Coordinate labor, machines, and inventory and optimize your company’s processes

**STAY ON ONE PLATFORM AS YOU GROW**
- Adapt the software to meet your changing needs
- Leverage powerful features and functions for multiple production environments

**MRP EXCEPTION MESSAGES HANDLE PROBLEMS WITH EASE**
- Shows the planner recommendations to defer, expedite, and delete supply items
- Identify late orders and display any transfers that are available from another warehouse or site

Maintain optimal inventory levels while keeping your customers happy
MATERIAL REQUIREMENTS PLANNING FEATURES AND CAPABILITIES

Forecasting
Forecasts can be calculated or entered manually. These forecasts can be dependent and consumed by sales orders, or they can be independent. Input forecasts as one-time, weekly, monthly, or yearly.

MRP Detail
Review and execute the complete material plan through MRP screens that show all activity, orders, requirements, balances, and recommendations for an inventory item.

Bucketless System
Enhance your manufacturing resource planning by planning every requirement for every item. Acumatica MRP does not ignore detail by grouping requirements together.

Multi-Site Planning
Controls whether MRP will plan requirements by site or by a combination of sites.

Exception messages help planners react to late orders, understand which orders to delete when demand changes, and provides a list of orders to expedite to meet current production plans.

ABOUT ACUMATICA
Acumatica Cloud ERP provides the best business management solution for digitally resilient companies. Built for mobile and telework scenarios and easily integrated with the collaboration tools of your choice, Acumatica delivers flexibility, efficiency, and continuity of operations to growing small and midmarket organizations.
