

COMBINE THE POWER OF EZCOM AND ACUMATICA TO ACHIEVE COST SAVINGS AND FUTURE FLEXIBILITY

BOOST YOUR TRADING PROCESS

Simply and speed transactions with an integrated EDI solution. Save time, increase trading volume and respond quickly to retailer changes.

ELIMINATE MANUAL ENTRY

Automatically receive and process sales orders without tedious data entry. Respond electronically with invoices and shipment information.

SCALE AND GROW

Add capacity quickly using Cloud technology. There are no user-based fees, so you can add users in seconds and get your entire team onboard.

DEPLOY ACCORDING TO YOUR NEEDS

eZCom's Connector can be deployed on a SaaS, hosted or on-premise version of Acumatica. It is install with a standard Extension project file.

BRING YOUR OWN DEVICE

Acumatica allows you to work from anywhere using any device with a standard browser. The interface is phone and tablet friendly and optimized for mobile networks.

LOCAL SUPPORT AND SERVICE

eZCom's EDI Connector for Acumatica is sold through value added resellers (VARs) who can provide planning, customization, local support and other business services. Our award-winning team of experts is ready to help with highly effective EDI integration options and trading partner solutions.

ELECTRONIC DATA INTERCHANGE (EDI)

Powerful features and the smart capabilities you need to efficiently process documents, keep all your trading partners happy and ensure that your EDI documents are in compliance.

Costly chargebacks, time consuming manual entry, compliance concerns, retailer-specific validation checks, drop ship errors and label printing problems can all be eliminated with eZCom's unique EDI extension for Acumatica designed specifically for vendors of all sizes.

Inventory ID	Line Description	Requested On	Ship On	Shipping Rule	Quantity	Qty. On Shipments	Open Qty.	Completed	Discoun Percent	Disc. Unit Price	Ext. Price

KEY FEATURES

Sales Orders	<i>Orders (EDI 850) are transferred directly from your Trading Partner to Acumatica's Sales Order screens. Scheduled automation tasks allow orders to appear in real time.</i>
Advance Ship Notices	<i>Integrated into Acumatica's Shipping process, ASNs (EDI 856) can be processed and sent automatically when items ship, including backorders.</i>
Invoicing	<i>When Invoices are created in Acumatica, an EDI 810 transaction is created for all EDI-type Orders. Invoices can be automatically submitted along with your ASNs.</i>
Duplicate Order Handling	<i>Duplicate Orders--from secondary EDI 850s, 860s or manually entered in Acumatica--are flagged for review. EDI 855/865 Acknowledgements can be sent automatically.</i>

Founded in 2000, eZCom Software, Inc. provides innovative supply chain solutions including the easy-to-use and streamlined EDI service, Lingo™. Lingo simplifies and speeds the trading process, while the eZCom technical support team goes above and beyond customers' expectations, from first inquiry through implementation to fully scalable expansion and sales growth.

Every member of the eZCom Customer Support Team is a trained EDI professional. Each works on-site at the corporate headquarters in New Jersey to help facilitate collaboration and maintain the high level of technical expertise. We provide customers with individualized, and highly effective education and problem solving throughout the EDI process whether they have no technical background, or a degree in technology.

Lingo has won multiple, prominent industry awards. At eZCom, we pride ourselves on serving as an extension of your internal team, and treat your company's issues as our own.
