

Solution Overview:

The **SPS Commerce Integrated Fulfillment (EDI) solution for Acumatica powered by MAPADOC** integrates seamlessly into your Acumatica ERP system, allowing you to send and receive EDI documents with ease.

By joining our network, you can connect to more than 3,000 retailers and trading partners through a single point of integration, eliminating the time and expense of managing unique EDI maps for every partner.

✔ **Increase document processing speed while decreasing errors and reducing chargebacks.**

✔ **Cut costs with a cloud-based EDI solution from SPS versus a traditional solution.**

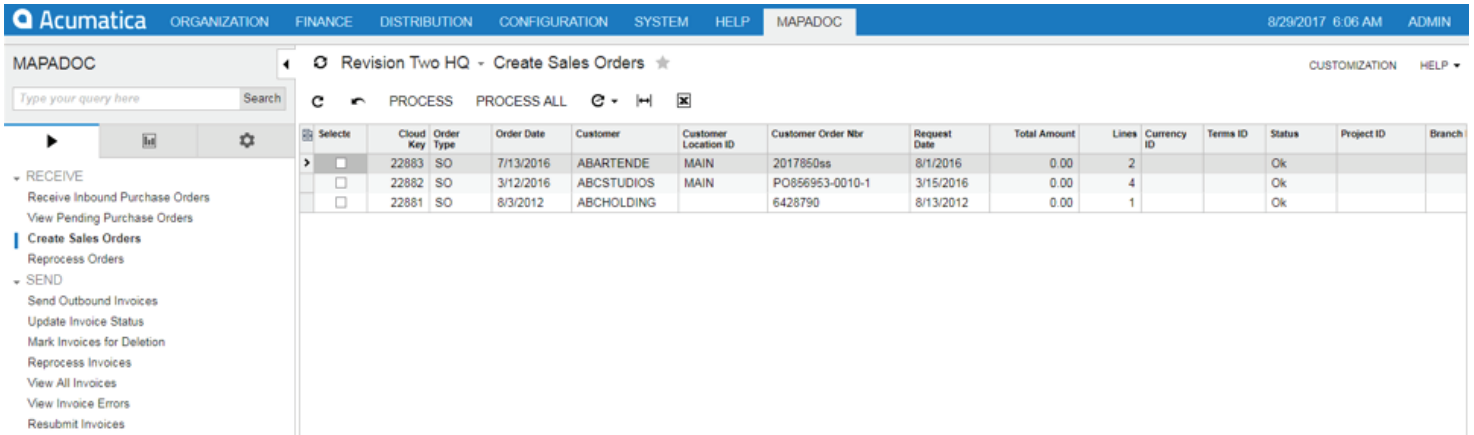

Key Benefits:

- Achieve compliance with all your trading partners through a single point of integration.
- Quickly connect to existing trading partners, 3PLs and more.
- Eliminate or significantly reduce manual order entry requirements and duplicate invoice entry.
- Integration is fully embedded within Acumatica to provide a streamlined user experience.
- Enhanced communication, visibility and efficiencies across your supply chain.
- MAPADOC has been integrating EDI to ERP systems for 25+ years.

Features and Functionality:

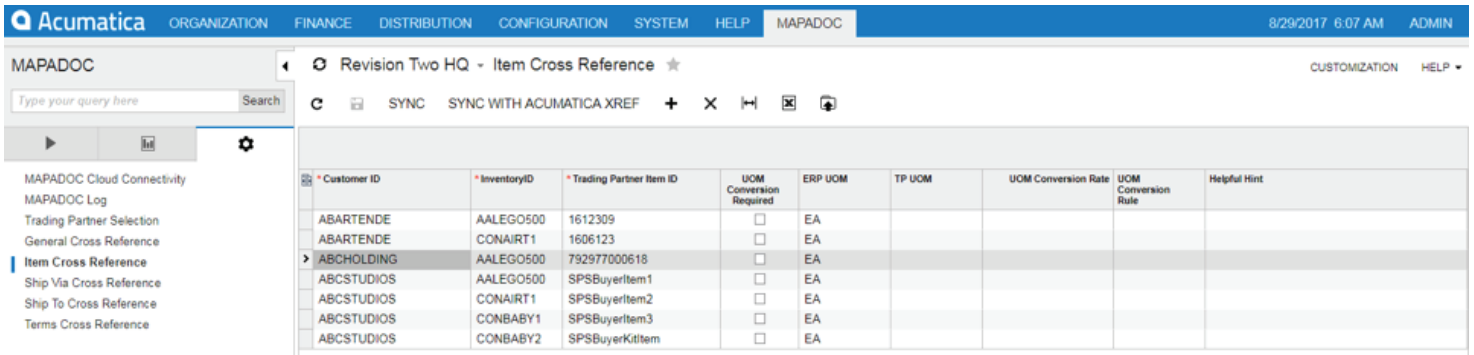

The integration is embedded in the Acumatica platform, providing a seamless user experience so that the user never has to leave Acumatica to process EDI orders and invoices.
