

## True Cloud Construction Software Gives General Contractors Access to Business-Critical Information Anytime, Anywhere

*Achieve greater profitability by connecting your people and projects and streamlining your processes.*

Construction projects are a sea of moving parts. As a general contractor, your ability to complete projects on time and within budget depends entirely on the level of collaboration between your central office and your field staff.

Whether you self-perform or manage sub-contractors, you need access to accurate, timely project data to make the strategic decisions that move projects—and your business—forward. Unfortunately, running a business with disconnected project teams results in delayed project updates, duplicate data entry, more errors, and unnecessary costs.

With Acumatica's true cloud construction software, you can easily manage your customers, finances—including job cost accounting—field and service teams in one cohesive solution. The bottom line is increased visibility, team collaboration, and profitability on every project.

*Easily manage projects and budgets.*

### KEY BENEFITS

#### GAIN COMPLETE CONTROL, MAXIMIZE PROFITABILITY

- Run more profitable projects by accurately forecasting and managing job costs, payroll, overhead, profit, cash, and much more

#### FOCUS ON THE PROJECT, NOT THE PAPERWORK

- Stay on top of every project and budget using real-time information at your fingertips
- Give your employees anytime, anywhere access from any device

#### EXPERIENCE PROFITABLE GROWTH

- Unlimited users give your entire workforce software access at no additional cost
- Grow your business without adding to your IT budget
- Get the latest software updates at no extra cost

#### GET THE BEST OF ALL WORLDS WITH CONNECTED CLOUD

- Integrate seamlessly with best-of-breed applications
- Connect to ProEst, Procore, Microsoft Office, DocuSign, CFMA Benchmark, and many more

## KEY FEATURES

<b>Financial Management</b>	Robust financials are simple enough for smaller contractors, yet scalable for complex needs. Acumatica has standard financial processes (GL/AP/AR) and reports. Multi-company, multicurrency, intercompany accounting, fixed assets, recurring and deferred revenue, and cash management.
<b>Job Cost Accounting</b>	Easily manage AP workflows, from entering an invoice through approval routing and checks. Seamless customer billing, driven by real-time project costing, includes up-to-date labor, material, equipment, and other costs. Proactively identify problem areas in current jobs and improve future project estimates.
<b>Project Management</b>	Gain a complete view of project details—including real-time field updates—providing instantaneous information between your project management team, back-office workforce, and management. Easily manage and track all activities, issues, changes, project documents, and job costs from one central area.
<b>Payroll</b>	Flexible payroll adapts to any construction organization supporting multiple unions, locals, classes, benefits packages, complex wages, certified wages, executive compensation, and commission structures.
<b>Commitments</b>	Control cost overruns by automating project commitments and change order processes. Create and track subcontract status, purchase orders, budget comparisons, line-item committed costs, and payments.
<b>Compliance</b>	Effectively manage lien waivers and releases, insurance certificates, and status updates, providing expiration and other alerts to staff and suppliers.
<b>Customer Relationship Management</b>	Easily see real-time data on all customer activities, including quotes, orders, invoices, payments, support cases, and service calls. Acumatica CRM also includes a self-service customer portal that lets customers access the necessary information.
<b>Mobile App</b>	Capture time, project issues, and change requests. Streamline service expense entry with scanned receipt image recognition from the mobile app. Increase efficiency by creating, editing, or deleting submittals and drawing logs with file or photo attachments and defined workflows from the mobile app for project activities.
<b>Advanced Material Management</b>	Streamline the management of project materials, including receipts and issues for purchased materials. Create requisitions with approvals workflow and create purchase orders to ship materials directly to a project location, creating an efficient workflow for job site deliveries.
<b>Change Management</b>	The change order is a document for profitability analysis and an audit trail of project revenue budget, commitments, and budgeted cost changes. Manage back charges or reduction in vendor commitments with the entry of a negative change order. Drop-ship workflows connected to change orders allow users to manage change orders easily. Streamline change orders for multiple construction projects with unit rate changes, custom retainage, and cost-only change requests.
<b>Progress Billing</b>	Flexible progress billing by quantity like linear or square footage reduces project owner risk while allowing customers to meet their unique business needs.
<b>Project Cost and Revenue Tax Zones</b>	Simplify the process of calculating taxes for a project – tax zones are specified directly in the project and automatically retrieved and calculated for all invoices, purchase orders, subcontracts, and expenses.
<b>Field Reports</b>	Ensure everyone has the same information, from subcontractor updates, job site visitors, issue and change tracking, and job site weather updates. Collaborate with project managers from the field with mobile entry of units installed or used during project tasks for improved planning, progress tracking, scheduling, and billing.
<b>CFMA Benchmarker</b>	Streamline collaboration with the CFMA by submitting preconfigured Acumatica construction financial data for inclusion in the CFMA Benchmarker survey. Benchmark your results directly against CFMA member peers with a custom dashboard with corporate return on assets, return on equity, and other financial ratios from CFMA members within your region.

### ABOUT ACUMATICA
