

## True Cloud Construction Software Gives Land Developers Access to Business-Critical Information Anytime, Anywhere

*Manage your projects with ease and maintain complete control—from excavation through infrastructure.*

As a land developer, you know it's essential to track your activities, specifications, engineering reports, schedules, and subcontractors so that you can minimize your road, water, wastewater, stormwater, electrical, gas, and other infrastructure costs.

Unfortunately, running a business with disconnected project teams can result in cost overruns, excessive paperwork, and frustration. That's why you need an integrated solution that you and your teams can access from anywhere.

Acumatica's true cloud construction software gives you total control over your land development projects. You can easily manage planned and actual budgets—including hard and soft costs and fees—with sub-jobs and industry-specific coding support. The bottom line is that you'll increase your visibility and profitability on every project.

*Easily manage projects and budgets*

### KEY BENEFITS

#### GAIN COMPLETE CONTROL, MAXIMIZE PROFITABILITY

- Run more profitable projects with accurate forecasting and management of job costs, payroll, overhead, profit, cash, and much more

- Get the latest software updates at no extra cost

#### GET THE BEST OF ALL WORLDS WITH CONNECTED CLOUD

- Integrate seamlessly with best-of-breed applications
- Connect to ProEst, Procure, Microsoft Office, DocuSign, CFMA Benchmark, and many more

## KEY FEATURES

<b>Financial Management</b>	Robust financials are simple enough for smaller contractors and scalable for more complex contractor needs. Acumatica Financial Management has standard financial processes (GL/AP/AR) and reports. In addition, it provides multi-company, multicurrency, intercompany accounting, fixed assets, recurring and deferred revenue, and cash management.
<b>Job Cost Accounting</b>	Easily manage AP workflows, from entering an invoice through approval routing and cutting checks. Seamless customer billing, driven by real-time project costing, includes up-to-date labor, material, equipment, and other costs. This detailed job cost information will help you proactively identify problem areas in current jobs and provide you with information to estimate future projects accurately.
<b>Project Management</b>	Gain a complete view of project details—including real-time field updates—providing instantaneous information between your project management team, back-office workforce, and management. Easily manage and track all activities, issues, changes, project documents, and job costs from one central area.
<b>Payroll</b>	Flexible payroll adapts to any construction organization. This solution supports multiple unions, locals, classes, benefit packages, complex wages, certified wages, executive compensation, and commission structures.
<b>Commitments</b>	Control cost overruns by automating your project commitments and change order processes. Easily create and track your subcontracts' status and purchase orders, including comparing budgets to actuals, tracking line-item committed costs, and monitoring up-to-date vendor payment status.
<b>Compliance</b>	Effectively manage lien waivers and releases, insurance certificates, and status updates, providing expiration and other alerts to staff and suppliers.
<b>Customer Relationship Management</b>	Easily see real-time data on all customer activities, including quotes, orders, invoices, payments, support cases, and service calls. Acumatica CRM also includes a self-service customer portal that lets customers access the information they need.
<b>Mobile App</b>	Get anytime, anywhere access. Quickly see critical reports on phones and tablets and give field teams and subcontractors tools to enter employee times and equipment details electronically. Access the complete system over any device and search for all project details from one global search box.
<b>Advanced Material Management</b>	Streamline the management of project materials, including receipts and issues for purchased materials. Create requisitions with approvals workflow and create purchase orders to ship materials directly to a project location, creating an efficient workflow for job site deliveries.
<b>Change Management</b>	Control cost overruns by automating your project commitments and change order processes. Manage back charges or reduction in vendor commitments through the entry of a negative change order.
