

# Cloudsnap & SAP Concur

We understand SAP Concur and the power of connected business systems.

Travel, expense, and invoice management is a critical part of your business. Concur Travel and Expense and Invoice Software is powerful, but your business depends on additional solutions and applications day-to-day. Working within each of these business applications creates silos and slows down the speed of which you do business often creating additional business problems. The need for a real-time, bi-directional connection, the ability to import and export purchase orders, and eliminate manual steps in your process such as data entry and manipulation plague productivity and efficiency.

## How we help

Make the tools that you already use work together. Cloudsnap is an integration platform as a service (IPaaS) that connects Concur Expense and Invoice to the business applications that you depend on the most, without the burden of manual or redundant applications.

## How We Do It

The magic of Cloudsnap is in our intuitive, powerful, and one-of-a-kind drag-and-drop workflow engine that easily maps and manipulates data seamlessly and behind the scenes. The end result is data that works for your business.

## What Makes CloudSnap Different?

**QuickConnects** Integrations in your control. Use our three step integration wizard to deploy the most common Concur Expense and Invoice use cases.

**Speed & Efficiency** Connect data between applications for even the most complex workflows. Have data flowing in a matter of minutes.

**Ease of Use** No code solution means you don't need to be a developer to use Cloudsnap. Integrate and "set it and forget it."

**Cost** Similar integrations can be cost prohibitive, but our QuickConnects and custom platform keep your costs lower.

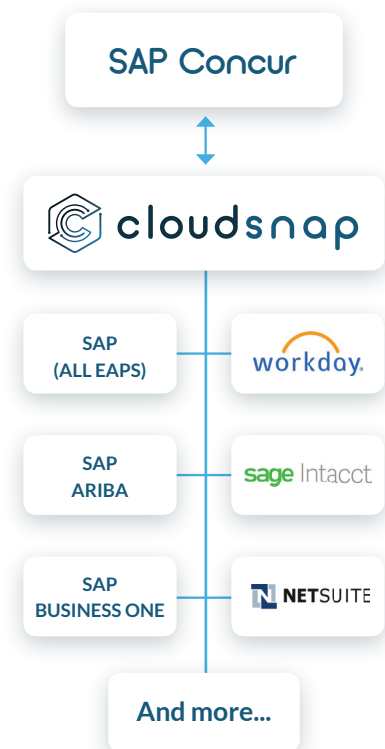

**ERP Focus** Our main focus is on Concur and integrating your business systems around it.

**We grow with you** As your business grows and changes, you can easily re-map fields as needed.

## More than just Concur

Additionally, we are able to integrate almost any of your business systems together.

**A few systems we connect to Concur Expense and Invoice:**

# The most common SAP Concur Issues Cloudsnap addresses:

## Concur Expense

- ◆ Cloudsnap delivers your project accounting codes or cost objects from your ERP system into Concur Expense. This eliminates manual or repetitive data entry.
- ◆ Once an expense report is approved and ready to be processed, Cloudsnap extracts all of the relevant data, aligns the format to match your ERP, and delivers the data into the ERP.
- ◆ Cloudsnap connects expense reimbursement data into your ERP or HR system to eliminate manual data entry.

## Concur Invoice

- ◆ Extract vendor information & cost objects into Concur Invoice, eliminating manual entry or reformatting.
- ◆ Extract purchase request and purchase order information from your ERP in real time, and deliver it into Concur Invoice. When the invoice arrives, it is matched to the PO data delivered from the ERP.
- ◆ Once an invoice is approved, Cloudsnap extracts the invoice data, cost codes, and data from the approval process, and delivers it into the ERP in near real-time.
- ◆ Cloudsnap handles payment information generated by Concur invoice (check, ACH, and credit card) and updates into the ERP with all of the details.

Cloudsnap is a Diamond Certified SAP Concur App Center Partner. We can connect almost any of your business systems to each other. We are constantly adding new connectors to further integrate your business to ensure we evolve with you.
