cloudsnap

Cloudsnap | Strong enough for the enterprise, accessible to all.

Cloudsnap changes the way you do business. Businesses don't have time, development resources, or people to manage complex and costly integrations. Cloudsnap doesn't require an ongoing time investment or development background from your staff. We allow your employees to focus on what they do best to add value to your business. Cloudsnap scales your business faster by streamlining data and ensuring all systems have the most up-to-date information. Cloudsnap can do anything. If we can access your data, we can connect almost any applications. Seriously.

Cloudsnap & your business:

• Intuitive drag-and-drop interface that doesn't require a development background. We made implementations easy for anyone--from front line employees to CEOs.

• Near real-time bi-directional syncing ensures all of your data is up-to-date, giving you a "golden record" of data.

• Reduce the risk of manual entry error and eliminate the need for data import/export and manual manipulation. No more wasted time on manual processes.

• No code solution: Anybody can do integrations. You don't have to be an IT expert. Put the power of integration into your hands.

What Makes CloudSnap Different?

QuickConnects   Integrations in your control. Use our three step wizard for common use cases. Have data flowing in a matter of minutes--not weeks or months.

Speed & Efficiency   Quickly connect data between applications for even the most complex workflows.

Ease of Use   No code solution means you don't need to be a developer to use Cloudsnap. Integrate and "set it and forget it."

Cost   Similar integrations can be cost prohibitive, but our QuickConnects and custom platform keep your costs lower.

ERP Focus   By focusing on the ERP, we automate your exact business processes to create a more efficient workflow.

We grow with you   As your business grows and changes, you can easily re-map fields as needed.

Customers   We serve customers of all industries and size. We ensure the integrations you need aren't just for Fortune 500 companies anymore.

What we do

Make the tools that you already use work together. Cloudsnap is an integration platform as a service (IPaaS) that connects the business applications that you depend on the most, without the burden of manual or redundant applications.

How We Do It

The magic of Cloudsnap is in our intuitive, powerful, and one-of-a-kind drag-and-drop workflow engine that easily maps and manipulates data seamlessly and behind the scenes. The end result is data that works for your business.

Industries

Cloudsnap is a solution built to scale across industries:
- Accounting
- CRM
- E-commerce
- Human Resources
- Non-profit
- Real Estate
- Property Management
- and more

Connect Your Applications in a Snap

Cloudsnap QuickConnects: Pre-built connectors for our most common use cases

User-friendly interface:
Our intuitive, step-by-step wizard walks you through just three steps to complete your Cloudsnap QuickConnect.

Current QuickConnects::
Below are just a few of our current, ready to deploy QuickConnects:

- Acumatica
- Intacct
- Microsoft Dynamics 365
- Netsuite
- SAP Business One
- SAP Concur
- Quickbooks Desktop
- Quickbooks Online
- and more added weekly

Cloudsnap support

- **Launch support**:
  A Cloudsnap Activation Coach will help you map fields that make the most sense for your business to complete your integration.

  This includes: **Three hours** of activation coach support for QuickConnects or a **dedicated implementation project manager** for custom integrations

- **Continued support**:
  If anything changes, we will update your connector to ensure your data keeps flowing.

- **New connectors**:
  We want to continue to integrate your business and are releasing new connectors based on customer feedback and requests.

Cloudsnap connects business systems to each other. We are constantly adding new connectors to further integrate your business to ensure we evolve with you.

Cloudsnap & Concur

We understand Concur and the power of connected business systems.

Travel, expense, and invoice management is a critical part of your business. Concur Travel and Expense and Invoice Software is powerful, but your business depends on additional solutions and applications day-to-day. Working within each of these business applications creates silos and slows down the speed of which you do business often creating additional business problems. The need for a real-time, bi-directional connection, the ability to import and export purchase orders, and eliminate manual steps in your process such as data entry and manipulation plague productivity and efficiency.

How we help

Make the tools that you already use work together. Cloudsnap is an integration platform as a service (IPaaS) that connects Concur to the business applications that you depend on the most, without the burden of manual or redundant applications.

How We Do It

The magic of Cloudsnap is in our intuitive, powerful, and one-of-a-kind drag-and-drop workflow engine that easily maps and manipulates data seamlessly and behind the scenes. The end result is data that works for your business.

What Makes CloudSnap Different?

QuickConnects Integrations in your control. Use our three step integration wizard to deploy the most common Concur use cases.

Speed & Efficiency Connect data between applications for even the most complex workflows. Have data flowing in a matter of minutes.

Ease of Use No code solution means you don't need to be a developer to use Cloudsnap. Integrate and "set it and forget it."

Cost Similar integrations can be cost prohibitive, but our QuickConnects and custom platform keep your costs lower.

ERP Focus Our main focus is on Concur and integrating your business systems around it.

We grow with you As your business grows and changes, you can easily re-map fields as needed.

More than just Concur

Additionally, we are able to integrate almost any of your business systems together.

A few systems we connect to Concur:
