Streamline Fulfillment to Reduce Errors, Generate More Transactions, and Increase Productivity

Warehouse Management integrates with all parts of the Acumatica Distribution Edition to accurately and efficiently manage advanced warehouse needs.

ADVANCED WAREHOUSE MANAGEMENT CAN HELP YOU

- **Reduce errors and improve customer satisfaction.** Mistakes in order fulfillment lead to costly returns and lower customer satisfaction. Efficient barcode scanning and verification of picked items eliminate over-shipments, under-shipments, and shipping incorrect items.
- **Automate routine picking, packaging, PO receiving, putting away, transferring, and physical counting tasks with customized workflows and form modes.** This eliminates the risk of people skipping important steps, increases productivity, and reduces training costs.
- **Leverage hands-free operation.** Preprinted smart scan sheets allow warehouse workers to perform all necessary system interactions with just a scanner—a handy feature for those who must wear gloves. For example, scan sheets include commands such as complete shipment, next/previous box, and remove item. Audible and visual indicators and warnings provide immediate feedback when incorrect items or more units than purchased are scanned.
- **Support lot and serial number tracking.** Serial and lot numbers are scanned and printed on the pick list and packing slip, so there can be no mistake about what was picked and shipped.

EFFICIENTLY HANDLE ORDER FULFILLMENT

- **Improve item picking.** Pick for multiple orders at once using wave or batch picking. Complete picking from inventory in a single pass.
- **Choose the preferred packing mode.** Pack items and generate mailing labels automatically based on package weights, or let the system tell you the required packaging for specific items.
- **Provide superior customer service.** Ensure timely pickup and delivery through carriers. Track all packages automatically. Notify customers of shipment progress through each stage of order fulfillment.
- **EDI support.** Advanced Fulfillment works with third-party EDI software for full EDI compliance, including 856 Advance Ship Notice (ASN), to electronically communicate the contents of a shipment.

KEY BENEFITS

**OPTIMIZE DISTRIBUTION**

- Upgrade receiving, inventory, and fulfillment
- Automate inventory transactions
- Improve data accuracy

**INCREASE PRODUCTIVITY**

- Automate manual tasks that often lead to errors and rework
- Perform more transactions with fewer errors and fewer employees
- Reduce training costs and allow seasonal workers to become productive more quickly
- Reduce order fulfillment cycle times

**INTEGRATE INVENTORY MANAGEMENT**

- Identify in-stock/out-of-stock items across multiple facilities
- Tailor mobile workflows on barcode scanners and mobile devices to update receipts, inventory, and shipments

**IMPROVE THE CUSTOMER EXPERIENCE**

- Use an automated, streamlined process to pick, pack, and ship the right product at the right quantity
- Offer a smooth return process by automatically including packing slip, instructions, easy return options, and return labels
ADVANCED FULFILLMENT FEATURES AND CAPABILITIES

Pick
- Generate wave or batch pick lists based on the best path for each available picker.
- Use barcodes to speed up the picking process.
- Barcodes on pick lists prevent picking items not included in the order.

Pack
- Provide adequate package size and packing material to ensure safe transport.
- Support barcodes and lot/serial numbers for accurate order completion.
- Easily correct errors in amount, weight, items, and more.
- Integrate with digital scales and printers to automatically weigh and print labels and packing slips.

Ship
- Select shipping provider: UPS, USPS, and FedEx, as well as international carriers.
- Ensure prompt pickup through your preferred carrier.
- Automate shipment label generation.
- Set up automatic tracking on all shipments.
- Notify customers of shipment progress through each stage of order fulfillment.

Scan bar codes and quantities for automated inventory transactions.
