Celigo integrator.io

integrator.io

Quickly Integrate Anything

Easily connect apps, sync data, automate processes with integrator.io

Simple and Powerful User Experience

- Guided design
- Organic user experience
- No need for hours of training

Leverages Prebuilt Integrations

- Bundles managed as SaaS apps
- No need to reinvent the wheel
- Fully featured and customizable

Flow-Based Subscription Model

- Start with a free flow
- Purchase flows, not endpoints
- Grow capacity as you need it

Start Integrating with the Free Edition
of integrator.io today.

One platform for all your integration needs

Integration Wizard
Step-by-step wizard with API assistants, visual field mapping, drop-down menus, and other tools for no-coding integration

Developer Tools
Advanced tools for creating and sharing stacks, generating tokens for direct API calls, building wrappers, and more

Integration Templates
Pre-packaged, reusable integration flows that can be installed, configured, modified, duplicated, or deleted

Actionable Dashboard
Full visibility to monitor, manage, and update integrations with access to error details and ability to re-run integrations

Integration Orchestration
Support complex processes by integrating multiple apps and data sources as part of single integration flow

Free Data Loader
Mass import hundreds, thousands, or millions of records to any cloud apps—for free

> Intuitive and easy for someone who is not a developer to quickly configure—a huge advantage if you want something where the heavy lifting is abstracted away.
>
> Ray Mckenzie-Young—IT Director, Corr-Jensen

> To date we have built over a 100 DIY data flows. It was incredibly intuitive, simple to use, easy to set up and immediate. And when something needed to be updated, we're able to jump in because we built them.
>
> Catherine Becraft—Project Manager, T. Elenteny Imports
