Seamless integration to payments and business solutions.

Integrating with Paya offers clients an all-in one solution with total visibility throughout the payments acceptance process.

Complete Payments Solution

- **Accept payments via the Acumatica Customer Portal**
  Accept Credit, Debit, or ACH seamlessly right inside the customer portal
- **Recurring Billing**
  Setup customizable payment schedules, utilize automated, recurring billing functionality and create and email transaction receipts
- **Level 2 and Level 3**
  Qualify transactions at the lowest interchange rates
- **Magento Shopping Cart Integration**
  Accept payments from a customer's checking or savings account

Our integration to Acumatica's ERP is quick and seamless and allows users to access a variety of payments features through our simple and secure API.

- Automatically mark invoices as paid
- Email payment reminders
- Collect payments for unpaid orders
- Save multiple credit cards for each customer
- Create, manage and delete tokens for saved customer card details
- Accept cash payments without having to store customer information
- Input new card information directly from the Payment and Application screen
- Ability to capture amounts less or more than the original authorized amount
