Enhance Quality and Accuracy as You Manufacture Complex Products

The Product Configurator, part of Acumatica’s Manufacturing Edition, is a powerful tool that enhances quality and accuracy in the manufacturing of complex products.

By allowing the user to configure a product’s features, options, and dimensions, the Product Configurator provides the tools you need to maximize your quote-to-order and manufacturing performance.

With this rules-based product configurator, you can configure products in multiple ways on quotes, sales orders, and production orders.

The Product Configurator greatly reduces the number of bills of material for a finished part based on a variety of features, options, dimensions, and functions.

**KEY BENEFITS**

**CREATE CONFIGURED ORDERS IN SECONDS**
- Create a new configured order by simply copying or modifying an existing configured order or quote

**GAIN CONTROL OVER REVISIONS**
- Make multiple revisions of the same configuration while maintaining a history of the revisions and who created them

**DETERMINE PRICES WITH EASE**
- Based upon the features and options chosen, the system has multiple price roll-up capabilities to determine the actual unit price for a specific configured item

Reduce the number of bills of material/routings for a finished part based on a variety of features, options, dimensions, and functions.
PRODUCT CONFIGURATOR FEATURES AND CAPABILITIES

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Configure to Order</td>
<td>Configure any item using predetermined features and options. The results of the configuration can carry forward to a production order.</td>
</tr>
<tr>
<td>Dimensional Capability</td>
<td>Use multiple dimensional calculations and formulas to calculate the material requirements for the specific components of configuration.</td>
</tr>
<tr>
<td>Order History and Look-Up</td>
<td>Easily look up a customer’s previous configuration to create the order or make adjustments from the prior configuration.</td>
</tr>
<tr>
<td>Multi-Level Configuration</td>
<td>Support multi-level configurations of regular, non-phantom, items by creating multiple production orders for each regular configured item.</td>
</tr>
<tr>
<td>Formula Validation</td>
<td>Validate formula calculation based upon minimum and maximum attribute values or quantities for selected features and options.</td>
</tr>
</tbody>
</table>

ABOUT ACUMATICA
Acumatica is the world’s fastest growing provider of cloud ERP, with the industry’s highest customer satisfaction rating trusted by companies across diverse industries. Acumatica is easy-to-use, full-featured and mobile software. With unlimited users, everyone can have a real-time view of your business anytime, anywhere.
