Gain Better Control and Visibility Over Your Labor Costs By Tracking Hours Digitally

Manage overtime, avoid duplicate data entry, and reduce labor costs by integrating ExakTime, an Arcoro Company, with Acumatica Construction Edition.

One of the most common challenges of any construction project is profit fade—when the job's margin suddenly decreases as work finishes. It's caused in part by contractors using paper time sheets and phone calls to determine the hours their field team has worked. Not only is this a time-consuming process, but it also leaves companies vulnerable to unexpected increases in labor costs.

Many projects require overtime to finish on schedule. If you don't manage overtime costs carefully, they can skyrocket and consume a large portion of your project budget.

With the real-time connection between ExakTime and Acumatica Construction Edition, employees can record their time on a mobile device so back-office staff won't have to chase down paperwork.   After the required fields are automatically filled in, Acumatica will export updates—including employee, location, and cost code—back into ExakTime. This integration can help you manage overtime, eliminate duplicate data entry, and reduce labor costs.

By connecting these two powerful systems, you'll gain better control and visibility over your labor costs, eliminate redundant data entry, and streamline your processes to reduce profit fade and ensure even more successful projects.

Key Benefits

MAINTAIN CONTROL AND VISIBILITY OF LABOR COSTS
- Determine the exact labor inputs associated with each contract your firm works on.

DECREASE YOUR ADMINISTRATIVE WORKLOAD
- Eliminate the need for duplicate data entry and duplicate employee data management across systems.
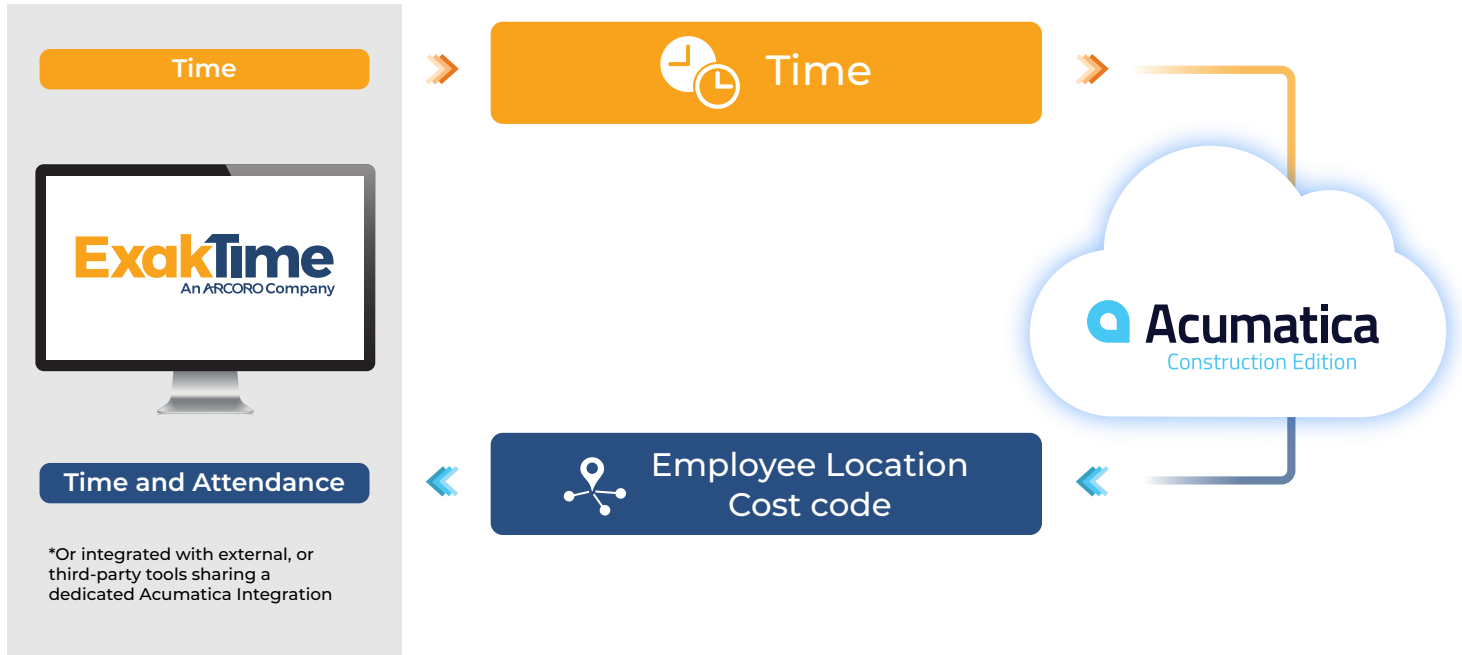

CREATE BETTER ESTIMATES
- Use accurate construction time tracking to estimate job costs more precisely.

GET THE BEST OF ALL WORLDS WITH CONNECTED CLOUD
- Set up and update your system easily with modern cloud connectivity.
- Brought to you by Arcoro and Acumatica—leaders in construction cloud technology.

Here's a breakdown of the data flows between ExakTime and Acumatica Construction Edition.

Time

ExakTime
An ARCORO Company

Time

Employee Location
