Acumatica
The Cloud ERP

The Future-Proof Acumatica Cloud ERP Infrastructure

Acumatica delivers a modern, full-function Enterprise Resource Planning (ERP) solution featuring integrated business functions, including financials, CRM, manufacturing, distribution, project management, construction, retail-commerce, and field services. Acumatica ERP leverages an infrastructure of core components that operate in the background so users can focus on workflows, productivity, and business logic.
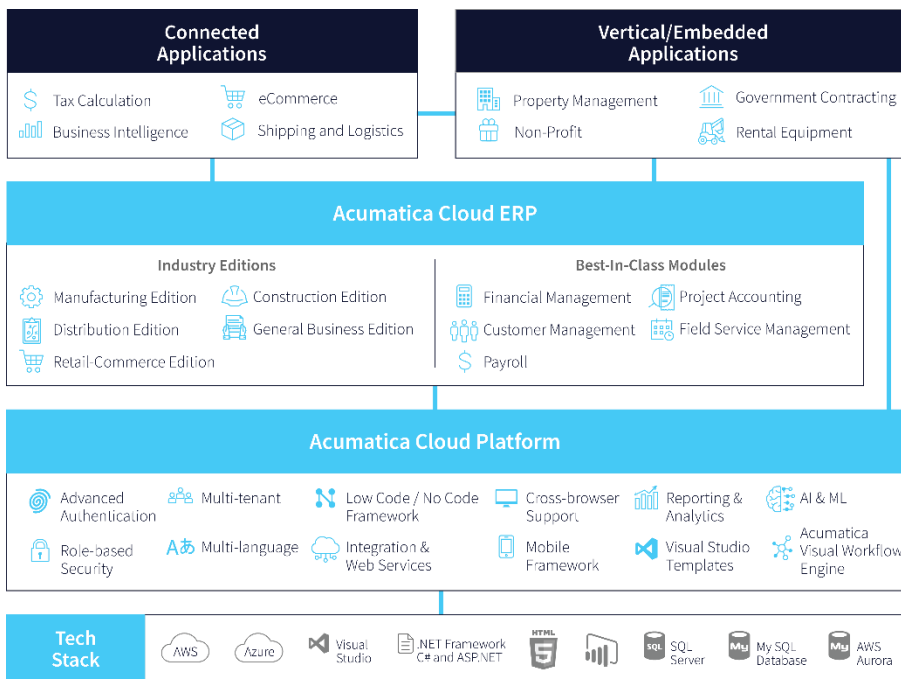

A PLATFORM BUILT FOR GROWTH

The Acumatica xRP platform is a versatile architectural framework and application development platform for building business applications. The platform empowers developers to tailor business processes and take advantage of artificial intelligence and machine learning technology. In addition, because Acumatica's ERP platform technology uses standard web technologies and development languages, you can modify your business logic using the platform tools or a separate integrated development environment such as Microsoft Visual Studio.

A unique feature of the Acumatica platform is the unlimited user license model. Add as many users as you need with no additional fees. Extend Acumatica to customers, vendors, and external business partners. Access Acumatica anytime, anywhere, on any device through secure web browsers or specialized, mobile applications.

The Acumatica platform is divided into application and system categories.

- System functions manage administration and configuration settings, such as security, languages, multitenancy, and external system integration.
- Application functions control access to application resources, such as reporting, document management, user interfaces, and notifications.

KEY BENEFITS

APPLICATION BENEFITS

- **Create custom displays, reports, and dashboards** – Personalized displays and dashboards present real-time data and KPIs. Get insights from standard and custom reports
- **Increase productivity** – Integrated workflows automate tasks, reduce errors, and improve efficiency
- **Improve ease of use** – Intuitive interface and consolidated toolbar promote easy navigation
- **Collaborate freely** – Share files in Document Mgmt. Edit PDFs via Adobe PDF markup. Add users, including external partners without added fees

SYSTEM BENEFITS

- **Anytime, anywhere access** – Provide 24/7 access from any device. Content responds to screen sizes, orientations, and resolutions
- **Flexible configuration options** – Support multiple configurations, including single or multitenancy, numerous business entities, and cloud or on-premises deployments
- **Localization and international support** –Support multi-language, multi-currency, multi-company, and country localizations
- **Data and platform security** – Limit user access. Define and control access policies by user, encode data
- **Audit user activity** – Monitor and audit user activities. Track history of changes by user, date, and time

Acumatica Cloud ERP Platform Components

APPLICATION FEATURES AND CAPABILITIES

User Interface	Create, configure, and maintain custom user interface elements and dashboards. Manage filter settings and change the structure (or site map) of Acumatica ERP.
Reporting	Design custom reports without coding. Access to the data model schema allows for quick and intelligent generic inquiries against the database, even on custom fields.
Workflow	The Visual Workflow Engine enables power users to see and modify states, actions, transitions, valid values, and enabled fields to control workflow without coding.
Multi-entity	Configure your organization as a single branch or multiple branches with different reporting settings to suit complex reporting requirements and data consolidation needs.
Notifications	Access all means of communication in your system: emails, event notifications, announcements, activities, and tasks. View documents requiring approval on a single form and set up personalized preferences.
Templates	Minimize input errors and save time when creating similar records with document templates and copy-and-paste options for most forms used for data entry.

SYSTEM FEATURES AND CAPABILITIES

Mobile	Support displays on any device, regardless of location. Automatically reflow content to respond to various screen sizes, orientations, and resolutions.
Multi-Language	Localize the system in multiple languages. Maintain the user interface and wikis in various languages if you have various locales. The default locale of Acumatica ERP is U.S. English.
Document Management	Create and manage organization wikis and wiki articles. The module helps you organize various file attachments along with their versions and storage settings.
Security	Manage local users, define, and manage user types, administer user access, set up security policies, view audit trails, manage digital certificates and database encoding. Set customer visibility by company or branch to limit the visibility of customer records.
Web Services API	Import data during initial system implementation and support the seamless integration of Acumatica ERP with third-party applications and other enterprise information resources over the system's lifetime.
Multitenancy	Manage multitenancy configuration and create, delete, and restore company snapshots.
Artificial Intelligence	Artificial intelligence with machine learning is used throughout the ERP for automating AP bills, expense matching, OCR scanning for business cards and other documents, and other business processes.

ABOUT ACUMATICA

Acumatica Cloud ERP provides the best business management solution for digitally resilient companies. Built for mobile and telework scenarios and easily integrated with the collaboration tools of your choice, Acumatica delivers flexibility, efficiency, and continuity of operations to growing small and midmarket organizations. **Business Resilience. Delivered**.
